/*05Report/*14
No.: 1802-N-01498
Date of arrival: 07-02-2018
Date of report: 09-02-2018

Patient identification:	dog	female	* 03.12.14
	Drentse Patrijs Fiene		
Owner / Animal-ID:	Linden van der		
Type of sample:	EDTA		
Date sample was taken:	06-02-2018		

Name: Fiene
Stud book no.: ---
Chip no.: 528140000595234
Tattoo no.: ---

vWD Type I
Result: Genotype N/vWD

Interpretation: The examined animal is heterozygous for the causative mutation for vWD Type I in the vWF-gene.

Trait of inheritance: autosomal-dominant with variable penetrance

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Bernese Mountain Dog, Coton de Tulear, Doberman, Drentse Patrijshond, German Pinscher, Kerry Blue Terrier, Manchester Terrier, Papillion, Pembroke Welsh Corgi, Poodle and Stabyhoun

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

sample ID: 1802-N-01498

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2005. (except partner lab tests).

*** END of report ***

Drs J. Vis

* * * It's breeding season again * * *

Bacteriological testing of cervical swabs offers important information on the clinical health of mares. Bacterial culture and identification of isolates and resistance testing by microdilution help in treating acute and subclinical infections.
